

Steno Finger Drills: Master Your Moneymaker

Are you looking to boost your typing skills and increase your earning potential? Look no further than Steno Finger Drills, the ultimate technique to master the art of stenography. With this comprehensive guide, we will dive into the world of Steno Finger Drills, exploring their benefits, techniques, and how they can transform your career into a lucrative moneymaker.

What are Steno Finger Drills?

Steno Finger Drills are a series of exercises specifically designed to improve typing accuracy, speed, and efficiency in stenography. Stenography is a specialized form of typing used by court reporters and transcriptionists to record speech at incredible speeds. By utilizing a stenotype machine, which combines multiple keys pressed simultaneously into phonetic codes, stenographers can achieve remarkable typing speeds of up to 225 words per minute.

Benefits of Steno Finger Drills

1. **Improved Typing Speed:** Steno Finger Drills help you develop muscle memory, allowing your fingers to move effortlessly across the stenotype machine. Over time, you'll experience a significant increase in typing speed, enabling you to transcribe faster and take on more clients or assignments.

The perfect steno book for court reporting students, professionals, or teachers. Contains extensive lists of drills covering all aspects of machine stenography. From basic Finger Drills suitable for the first day of Theory Class to two-handed finger-twisting drills that professional stenographers will find extremely challenging, this book will give you the machine shorthand workout that you need. It is 143 pages of steno drill after steno drill, all designed to get you stroking strong, clear, and confident. Master your keyboard, and you will find that speedbuilding is much easier. Each chapter focuses on a specific part of the steno keyboard. The easiest drills are in the first part of the book. The drills become progressively harder as you work your way through the chapters. The final nine chapters contain drills for both hands at once. There are three basic types of Finger Drills used in this book. Familiarity Drills are large tables with one key, letter, or combination in each cell of the table. Each cell is one stroke. There

is one Familiarity Drill in each chapter, except for the Dexterity Drill chapters. Each drill takes up an entire page. Rhythm and Speed Drills are three- or four-stroke drills that you repeat over and over. Each chapter, except for the Dexterity Drills, contains over 20 Rhythm and Speed Drills. They look like this: S H K P Each letter is a separate stroke. S is the first stroke. H is the second. K is the third. P is the fourth. Work on one drill at a time until you achieve an acceptable level of rhythm and clarity. The third type of drill are the Dexterity Drills. Each Dexterity Drill chapter has over 20 separate drills. They look like this: FBGT RPLS Dexterity Drills are two-stroke drills. In this example, the first stroke requires the first and fourth fingers to stretch up for the F and the T while the two middle fingers reach down for the B and the G. The second stroke is the exact opposite. Not all Dexterity Drills are exact opposites, but they are designed to be “finger twisters.” All Dexterity Drills are designed to improve muscle coordination.
